

# AstroPoetry

Practice making observations while creating a poem about an astronomical object.

Scientists use their observation skills to analyze the structures and light coming from objects in space. Look closely at the image below, then use the three columns to brainstorm nouns, adjectives, and verbs that describe the image.

Nouns

Adjectives

Verbs

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Black and white image of an object in space called the Lagoon Nebula, taken by a MicroObservatory telescope.

Now combine your words in any order you like to create a poem. It's perfectly acceptable to add words such as: it, the, like, etc to complete the lines of your poem.

_____
_____
_____
_____
_____

Increase your creative powers of observation by taking your own telescope images like this one using the MicroObservatory Robotic Telescopes. Visit [MicroObservatory.org/OWN](http://MicroObservatory.org/OWN)
